

AirO Film[®] Agri

breathe eAsier

Air-O-Film[®] Agri is ideally suited to the following applications:

The ideal wrapping solution for fruit and vegetables

Product Overview

Fruit and vegetables typically have high levels of water content and this makes them particularly sensitive to their environment. Unless they are transported under the correct conditions they can very quickly and easily deteriorate. Using Air-O-Film[®] Agri, a pre-stretched vented stretch film, improves shelf life and ensures that this type of load arrives in perfect condition.

Aeration Allows Natural Ripening

Because it has such large openings, Air-O-Film[®] Agri gives effective aeration. Not only does this prevent damage, it allows the product to ripen naturally.

Holding Force

Furthermore, Air-O-Film[®] Agri has been specially designed to offer superior performance. This ensures that even the heaviest loads will remain secure during transportation.

Less Material - Less Waste

As well as being fully recyclable, Air-O-Film[®] Agri offer an environmental benefit because loads can be secured using less material. Using a small amount of one material not only saves money during wrapping, it means that when the load is unwrapped at the distribution center, it is quicker and easier to recycle. This is especially true when comparing Air-O-Film[®] Agri to alternative solutions, such as corner boards and straps.

High Visibility & Great Appearance

Air-O-Film[®] Agri is manufactured using the finest components which provide superb clarity and excellent pallet appearance. Wrapping a load with Air-O-Film[®] Agri sends a clear message to your customers - that you care about the quality of your product and are doing everything in your power to ensure that it arrives in the best possible condition.

The ideal wrapping solution for fruit and vegetables.....

Air-O-Film® Agri can be applied to loads in the following ways:

Manually, by hand

Giving you the flexibility to wrap whenever and wherever you choose.

Semi / Automatic Machine

Air-O-Film® Agri is also available in machine rolls, suited to semi or automatic application.

Advantages of Air-O-Film® Agri

USE LESS - SAVE MORE

Due to the unique design of Air-O-Film® Agri you need less material to wrap a load when compared to alternative solutions, such as corner boards and straps. Not only does this minimize the packaging cost, it makes it far easier to handle and much cheaper.

EXCELLENT PALLET PERFORMANCE

The superb holding force of Air-O-Film® Agri in combination with its impressive strength ensures perfect pallet stabilization without damaging the carton boxes or other packed materials.

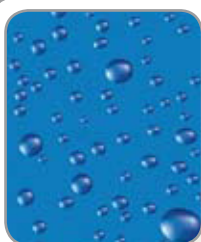

ENHANCED GRIP & AERATION

Air-O-Film® Agri exhibits high holding capabilities which tend to contract, producing a tighter wrap around the palletised load. At the same time the perforations provide an excellent level of aeration.

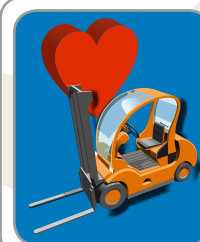

NO REDUCTION IN WIDTH

Regular stretch film and knitted netting reduce in width after stretching. Air-O-Film® Agri is ergonomically designed to save you time, material, and cost.

PREVENT CONDENSATION

If condensation is allowed to build up within a load then there can be many problems. It may become unstable and fall over, it might damage the outer packaging, thereby spoiling the delivery or, in extreme cases, the product itself may be damaged and rejected.

FORKLIFT FRIENDLY

Like netting, the reinforcing strips on competitive products can often come away from the base film and become entangled within the wheels and bearings of forklifts. The design of Air-O-Film® Agri prevents this from happening.
